# TotalFinder

TotalFinder is a plugin/tweak for Finder.app which adds a dual panel view, additional keyboard shortcuts, colored labels, advanced path copying, cut and paste, and many other useful features.

Compatible with macOS 13 Ventura, 12 Monterey, 11 Big Sur, and 10.15 Catalina.

Compatible with Apple Silicon (M1, M2, etc.), though **not officially supported**.

TotalFinder unfortunately requires **System Integrity Protection** to remain weakened while in use.

To find the correct TotalFinder version for older macOS versions, please **check the compatibility table**.

The documentation is located at:
https://totalfinder.binaryage.com/about

TotalFinder is no longer sold or officially supported.

Feel free to talk about TotalFinder in the discussion thread on the BinaryAge forums:
